Discover new directions in mid-rise timber construction

From iconic, sustainably designed apartments and innovative office buildings to cost-saving urban infill projects, traditional timber framing and new massive timber building systems are revolutionising the design and construction sector. See case studies from international and local experts and learn how you can access specialist resources to add the benefits of timber to your projects.

**When: Wednesday 8 March
7.30am Registration & breakfast
buffet for 8.05am start**

**Where: 242 Telstra
Conference Centre Auditorium
1/242 Exhibition St,
Melbourne VIC 3000**

Cost: \$65 including breakfast

**CPD: certificates of attendance
available for all professions.
Informal CPD points available
for attendance.**

**Andrew Waugh
Waugh Thistleton Architects: London**

Andrew is a founding Director of Waugh Thistleton a world leading architecture practice in sustainable design and the use of cross-laminated timber.

In 2010 Andrew was awarded the RIBA president's medal for research for his work on the feasibility and practice of timber structures for high rise buildings.

Hear Andrew discuss two iconic UK cross laminated timber (CLT) projects, Dalston Lane and Stadthaus, Murray Grove.

**Jonathan Evans
Tzannes: Sydney**

A Design Director at TZANNES, Jonathan leads the company's sustainability ambition to achieve net zero carbon emissions for the built environment.

Jonathan will discuss the 6-storey International House at Sydney's Barangaroo South, Australia's first engineered timber office building.

Speakers from WoodSolutions

David Bylund
WoodSolutions

A qualified architect and WoodSolutions Mid-rise Advisory Program team member, David facilitates opportunities for building and designing in timber. He will introduce the Program and give a brief overview of the NCC 2016 Fire Protected Timber DTS provisions.

Paolo Lavischi
WoodSolutions

Paolo's experience in timber structures spans from building design to project management, standardization, Life Cycle Assessment and software development. Paolo will report on trends in adopting timber systems for mid-rise structures as observed within the first 6 months of the Program's team activity.

Melbourne Program, Wednesday 8 March

07:30am	Registration and breakfast buffet
08:05am	Welcome - Eileen Newbury, National Marketing and Communications Manager, WoodSolutions
08:10am – 11:05am	Speakers sessions
11:05am – 11:30am	Panel discussion
11:30am	Event concludes
